### Cleaning Process

We use truck mounted equipment and specially-formulated cleaning agents to get your carpet and upholstery deep down clean. Our employees are trained to use the most current cleaning methods and procedures:

- Hot, soft water and our cleaning solution are injected deep into the carpet fibers
- Loosens and lifts ground in dirt and soil
- Powerful suction extracts deep down dirt, cleaning solution and 95% of the moisture which results in a faster drying time
- Leaves no cleaning solution residue
- Helps remove dust, mites, allergens and other microscopic pollutants that collect in your carpet - irritants which can trigger allergies and other breathing problems

| <b>One Time Cleaning Prices:</b> | <b>(High Traffic)</b> | <b>(Full Clean)</b> |
|----------------------------------|-----------------------|---------------------|
